

mobyCMS

Content Management System

Your end-to-end solution for an easy-to-use and a more efficient means to manage and update your web content. mobyCMS enables highly customised layouts and interactive functions.

Easy Update

Easily update website through an intuitive user-friendly backend management system. Website content can be kept very up-to-date and changes made very quickly by internal staff without engaging external professionals.

Platform Independent

The software is installed on a web server that allows users to easily access the system from any location as long as internet access is available.

Centralise Control but Decentralise Work

Allows for website updates to be decentralised to the various departments and yet maintain overall look and feel.

Built-in Search Function

Allows users to do searches within your website.

Preview Before Publish

Allows preview of the website internally before publishing to the internet.

File Versioning

Tracks version changes for desired file, this allows user to rollback to a specific version if desired. Enhances security to protect against accidental file overwrite.

Advanced Link Management

Detects broken links and keeps internal links intact after Move, Rename or Delete operations.

WYSIWYG Editor

Editing content is easy with the built-in What-You-See-Is-What-You-Get editor.

Scaleable

Can run on 1 to many servers to handle multiple web sites.

Compatibility

Based on standard java technology, supports a wide number of commercial and open source databases and operating systems, thus, fit in almost all existing IT environments.

About Us

PTS is the leading provider of multiple channel access-capable solutions which are truly integrated across the widest range of new media channels and devices (eg. computer, mobile phone, PDA etc). Our business solutions are designed with usability, accessibility, reliability and expandability, giving you a competitive edge in the dynamic business environment.
